

Agion Active T

Jan Sikora Scales Mountains and Conquers Stink

TESTER CASE STUDY

ACTIVE™

T Tester Summary

NAME

Jan Sikora

WORKOUT

Three day trek: bouldering, rock climbing and jogging

PLACE

Frydek-Mistek, Czech Republic

RESULT

"I wore an Agion Active T-shirt during a three day climbing trip. We jogged, bouldered and climbed and still on day three, I did not detect any odor."

Jan Sikora is an outdoor enthusiast with a passion for climbing and bouldering. Bouldering is a style of climbing done without a harness or ropes. The freestyle technique involves individual moves or short sequences of moves over smaller expanses of rock, unlike traditional rock climbing, which is usually done over longer stretches of rock.

Bouldering emphasizes both the climber's concentration and the climber's physical strength, as it is needed to support and propel the entire body. When he heard of the stink-free promise of Agion Active technology, he decided to put it to the test.

When Jan and his friends set out on a three day trek of bouldering and rock climbing, Jan took along the Agion Active T shirt to see if the "Stink at Nothing" promise would hold up in the face of such an active sport.

"On day three, I still did not detect any odor. This was great for me, but even better for my friends as we were traveling together and staying in tight quarters!"

As a warm up, prior to beginning their series of challenging climbs, Jan and his friends went jogging. Jan wore his Agion Active shirt for three straight days – three days filled with jogging, scaling vertical rock faces and strenuous bouldering. Much to his friends' relief, Jan didn't stink.

"I wore the Agion Active T shirt for three straight days of sport, during which I was sweating profusely," said Jan. "On day three, I still did not detect any odor. This was great for me, but even better for my friends as we were traveling together and staying in tight quarters!"

"One of the reasons I enjoy bouldering is because it requires very little equipment. If I could pack just one shirt for the duration of my trip, I would be able to pack even lighter. The Agion Active shirt still did not smell on day three, allowing me to wear it day after day. It will take the place of three shirts on my future trips, enabling me to pack less. A great benefit when you are lugging around your gear!"
